

## **More information on Hemp Clones from PWP Greenhouses**

CBD and THC test results of these varieties are available.

Purchase Requirements: A copy of your 2019 TDA issued Hemp license and a TDA Permit to move the plants to your location must be presented at time of purchase. PWP Greenhouses will provide you with industrial hemp plants as indicated and directed below. You will need to arrange for your plants to be picked up at our facilities in Pall Mall, Lenoir City, and Murfreesboro.

We guarantee the health and quality of plant material; however, once the product leaves our facility it becomes the buyer and transporters responsibility. PWP has no control or liability once the plants are loaded.

In order to begin production and receive scheduling priority, PWP requires a non-refundable deposit of 20% of the total sales order. The final balance remaining must be paid in full with certified funds or cash prior to clone pick-up at our facility. All forms of payment must clear our bank before pick-up. If you come with a payment that cannot clear our bank that day, your order will not be released. Credit cards are accepted.

Currently we expect to offer over 350,000 clones which will be produced over a 10 week period beginning the week of May 5, 2019. If you need plants outside this period let us know well in advance.

Amounts of varieties are limited per week; therefore orders will receive scheduling priority based upon the date the order and deposit is received. Orders for 5000 or more clones of any one variety to be available during any one week must be received at least 90 days in advance. Should the varieties requested not be available, we will offer as replacement the best available clones at the time or schedule a portion of your order for an alternate week.

Confirmation of availability of order is provided to the customer by PWP periodically as we approach your delivery date. If PWP does not or cannot provide your clones to customer in a timely manner, all deposits shall be returned.
